

MOKU European Oak Floorboards Care Instructions

Engineered floorboards from Moku are durable and made of premium real European oak for your modern home, Simple care and maintenance procedure will ensure it stays looking beautiful for years to come.

- Use protective mats at all exterior entrances and high traffic areas, as well as weather strips to help maintain the temperature and humidity, and keep the floor stable.
- Use felt protectors under all furniture and quality chair mats under chairs with castors. Rubber-based items should not be in direct contact with the floor.
- Sweep and vacuum as often as possible to remove any loose grit or dirt. Use a suitable dusting pad, soft broom or vacuum cleaner with a soft brush.
- Keep pet's nails trimmed to protect the floor from scratches.
- Avoid using excessive amounts of water and always use a well wrung out mop. If spills occur, wipe as quickly as possible. **NEVER USE STEAM MOPS.**
- Be mindful of the shoes you wear. High heeled shoes and any sports shoes with spikes can cause significant damage to the top layer of engineered hardwood.
- Never slide or roll furniture or appliances across your floor.
- Do not use soap, wax, oil, detergents, or other household products to clean your floor. Only use reputable floor cleaners, specific for your type of floor.
- Use curtains, blinds, or UV-resistant films on windows to help reduce the flooring's exposure to direct sunlight.
